Special Issue

FRONTIERS IN CHEMICAL REACTION ENGINEERING

CONTENTS

Reaction Engineering for the new millennium
J. Santamaria 1

High-throughput synthesis and screening of catalytic materials. Case study on the search for a low-temperature catalyst for the oxidation of low-concentration propane
U. Rodemerck, D. Wolf, O.V. Buyevskaya, P. Claus, S. Senkan and M. Baerns 3

Eggshell catalysts for Fischer–Tropsch synthesis. Modeling catalyst impregnation
C. Galarraga, E. Peluso and H. de Lasa 13

Correlation between catalytic activity and support reducibility in the CO_2 reforming of methane over $Pt/Ce_xZr_{1-x}O_2$ catalysts
F.B. Noronha, E.C. Fendley, R.R. Soares, W.E. Alvarez and D.E. Resasco 21

Improved catalytic performance of Keggin-type polyoxometalates in the oxidation of isobutane to methacrylic acid under hydrocarbon-lean conditions using antimony-doped catalysts
F. Cavani, R. Mezzogori, A. Pigamo and F. Trifirò 33

Production of benzaldehyde: a case study in a possible industrial application of phase-transfer catalysis
J.A.B. Satrio and L.K. Doraiswamy 43

Structured reactors for kinetic measurements in catalytic combustion
G. Groppi, W. Ibashi, E. Tronconi and P. Forzatti 57

Improved-performance knitted fibre mats as supports for pre-mixed natural gas catalytic combustion
I. Cerri, G. Saracco, V. Specchia and D. Trimis 73

A simple adsorber dynamics approach to simulated countercurrent moving bed reactor performance
S. Huang and R.W. Carr 87

Design methodology and operation of a simulated moving bed reactor for the inversion of sucrose and glucose–fructose separation
D.C.S. Azevedo and A.E. Rodrigues 95

Partial oxidation of methane to formaldehyde with 50% yield in a continuous recycle reactor separator (CRRS)
I.C. Bafas, I.E. Constantinou and C.G. Vayenas 109

Electrochemical chlorine absorption in cyclone membrane reactor: analysis of reaction mechanism and transport phenomena
K. Sundmacher and T. Schultz 117

Influence of the ejector configuration, scale and the gas density on the mass transfer characteristics of gas–liquid ejectors
P.H.M.R. Cramers and A.A.C.M. Beenackers 131

Non-isothermal gas–liquid absorption with chemical reaction studies. Temperature measurements of a spherical laminar film surface and comparison with a model for the CO_2/NaOH system
M. Taghizadeh, C. Jallut, M. Tayakout-Fayolle and J. Lieto 143

The application of monoliths for gas phase catalytic reactions
R.M. Heck, S. Gulati and R.J. Farrauto 149

Fundamental and environmental aspects of landfill gas utilization for power generation
W. Qin, F.N. Egolfopoulos and T.T. Tsotsis 157

Chemical recycling of mixture of waste plastics using a new reactor system with stirred heat medium particles in steam atmosphere
T. Masuda, T. Kushino, T. Matsuda, S.R. Mukai, K. Hashimoto and S.-i. Yoshida 173

Ultrafine particle fluidization and its application to photocatalytic NO_x treatment
S. Matsuda, H. Hatano and A. Tsutsumi 183

The role of Fenton's reaction in aqueous phase pulsed streamer corona reactors
D.R. Grymonpré, A.K. Sharma, W.C. Finney and B.R. Locke 189

Degradation kinetics of 2,4-D in water employing hydrogen peroxide and UV radiation
O.M. Alfano, R.J. Brandi and A.E. Cassano 209

Catalyst dynamics: consequences for classical kinetic descriptions of reactors
T. Johannessen, J.H. Larsen, Ib Chorkendorff, H. Livbjerg and H. Topsøe 219

Comparison of CFD simulations to experiment for convective heat transfer in a gas–solid fixed bed
M. Nijemeisland and A.G. Dixon 231

Using CFD for scaling up gas–solid bubbling fluidised bed reactors with Geldart A powders
R. Krishna and J.M. van Baten 247

The staging in fluidised bed reactors: from CSTR to plug-flow
I. Miracca and G. Capone 259

Computer generation of a network of elementary steps for coke formation during the thermal cracking of hydrocarbons
S. Wauters and G.B. Marin 267

The effect of pore blockage on the diffusivity in ZSM5: a percolation approach
A.O.E. Beyne and G.F. Froment 281

Monte Carlo simulations of the effect of crystallite size on the activity of a supported catalyst
F. Gracia and E.E. Wolf 291

Kinetics of high-temperature reaction in titanium–nitrogen system: nonisothermal conditions
L. Thiers, A.S. Mukasyan, A. Pelekh and A. Varma 303

The kinetics of methane steam reforming over a Ni/α-Al_2O catalyst
K. Hou and R. Hughes 311

Modeling of microkinetics in heterogeneous catalysis by means of frequency response techniques
A.R. Garayhi and F.J. Keil 329

A kinetic and mass transfer model to simulate the growth of baker's yeast in industrial bioreactors
M. Di Serio, R. Tesser and E. Santacesaria 347

Short communication

A catalytic heat-exchanging tubular reactor for combining of high temperature exothermic and endothermic reactions
Z.R. Ismagilov, V.V. Pushkarev, O.Yu. Podyacheva, N.A. Koryabkina and H. Veringa 355
